

NCEH GIS PROJECT

- **\$1,200,000 investment in ESRI GIS software**
- **NCEH GIS Steering Committee**

- **ArcInfo (Desktop)–To create, edit, and prepare maps that can be published on the website (data creation, update, query, mapping, and analysis system)**
- **ArcIMS – To disseminate high-end geographic information systems (GIS) and mapping services via the Internet**
- **ArcSDE –To serve spatial data to the Desktop and the Internet (relational databases)**

Purposed CLPPP USE

- **Provide a tool to “target” high risk areas**
 - **2000 Census access**
- **Web browsing for data**
- **Working with your (CLPPP) data**
- **Geocoding capability**
- **GPS technology**
- **FGDC Metadata compliant**

GIS training for CLPPPs

- **Commercial GIS courses**

- NCEH co-sponsors training at national conferences
- CDC satellite course for distance learning

On-line tutorials for NCEH software and Internet applications

LPPB Web Site

2000 Census Data Capability

- **Data Mapping**
- **Data downloading**

Present LPPB Capability

- ArcGIS Training
 - Detroit and Virginia
- Geocoding services
- Collaborative GIS studies

CDC

Continuation

- LPPB GIS WORKGROUP
- ArcView GIS Course
